Subject: Formal Comment Submission Regarding the Ongoing Shortage of FDA-Approved Semaglutide Injection Products, **Docket No. FDA-2015-N-0030-0001**

Dear Commissioner Califf, Ms. Jensen, and Dr. Bormel:

I am writing on behalf of the Alliance for Pharmacy Compounding in response to ongoing issues related to the availability of FDA-approved semaglutide injection products. We have gathered recent data illustrating the persistent shortages of these medications and wish to formally submit this information for consideration to the docket on compounding.

As part of our efforts, we have collected anecdotal evidence and dispensing data from a range of pharmacies across the country. Attached to this letter, you will find screenshots received just today from multiple pharmacies, showcasing limited availability from a diverse selection of wholesalers nationwide.

To further quantify the scope of this issue, I reached out to several compounding pharmacies willing to share their dispensing data. Thirteen pharmacies reported a combined total of over 170,000 semaglutide injection prescriptions filled per month. This data represents only a small sample of the compounding pharmacy industry; the true national figure will certainly be exponentially higher. Given the volume of prescriptions being dispensed, it is evident that drug manufacturers will need substantial production capacity to meet the current patient demand.

Additionally, a prominent telehealth platform that provides these medications conducted a survey among patients. Of the 215 respondents, 56% indicated difficulty in sourcing these drug products, with Wegovy and Ozempic cited as the two most challenging to obtain.

Below is the approximate monthly dispensing data from the 13 de-identified pharmacies:

Pharmacy Monthly Prescriptions Dispensed

A	32,000
B	2,600
C	42,000
D	1,600
E	40,000
F	200
G	600
H	2,000
I	500
J	2,500
K	21,500
L	26,000
M	1,700
Total	173,200

We hope this information helps to illustrate the current demand for semaglutide injections and the challenges patients face in accessing these medications. We urge the agency to consider this data – and to take into account demand for the compounded version of these drugs that will need to be shifted to the FDA-approved versions of semaglutide – when making determinations about the current shortage.

Thank you for your time and consideration. Please do not hesitate to reach out if additional information or clarification is needed.

Sincerely,

Tenille Davis, PharmD, RPh, BCSCP, FAPC

Chief Advocacy Officer
