Subject: Formal Comment Submission Regarding the Ongoing Shortage of FDA-Approved Semaglutide Injection Products, **Docket No. FDA-2015-N-0030-0001**

Dear Commissioner Califf, Ms. Jensen, and Dr. Bormel:

Thank you for your attention to my letter submitted on November 15 regarding the persistent shortage of FDA-approved semaglutide injection products. Since that submission, we have received additional reports from our members, which further underscore the critical role compounded semaglutide products continue to play in addressing patient needs during this shortage.

Attached are the latest screenshots from wholesalers indicating continued limited availability of FDA-approved semaglutide products. Additionally, we have gathered dispensing data from 15 additional compounders, which collectively account for nearly 40,000 compounded semaglutide prescriptions per month. This volume highlights the substantial patient reliance on compounded products to fill the gap created by insufficient supply of FDA-approved medications.

Below is a breakdown of prescriptions dispensed monthly by these 15 additional pharmacies:

Pharmacy Prescriptions/Month

AA	830
BB	1,700
CC	8,800

Pharmacy Prescriptions/Month

DD	250
EE	475
FF	2,700
GG	6,000
HH	2,400
II	1,000
JJ	3,500
KK	1,700
LL	6,200
MM	3,000
NN	350
OO	600
Total	39,505

These numbers emphasize the need for a robust supply chain of FDA-approved semaglutide products. We urge the agency to address manufacturing shortages promptly to ensure adequate availability for patients who depend on these therapies.

We remain committed to supporting the FDA in addressing this issue and are available to provide any additional data or insights that may aid in resolving these shortages effectively.

Thank you for your continued attention and consideration.

Sincerely,

Tenille Davis, PharmD, RPh, BCSCP, FAPC
